

# VISUALEGACY

Your Story. Simply Told. We'll Help.

A visualegacy is a short video history of a person's life.

It is a record that can live on long after they do.

It highlights their **experiences**, their **personality** (what they learned and became from those experiences), their **relationships** (who they loved), and allows them to give some **advice** for their posterity.

*"I wish I had done this for my parents years ago."*

*"Now they will know my mind and my heart, thanks."*

*"An amazing story, frozen in time. Awesome!"*

*"Leaving the note has never been made so easy."*

*"I Cried. I Cried. I Cried."*

# VISUALEGACY

Your Story. Simply Told. We'll Help.

## History is what survives.

Very few individual life stories have survived through the ages.

### Until now.

We live at the crossroads of technology, where our stories can and should survive - from this day forward - until the end of time.

## A Very Simple Process.

We come to your home (or another location, or our studio) and in just about an hour or two, our friendly interviewer will record a one-on-one interview using high quality 4K cameras.

Within two weeks, you'll receive a USB drive with the final edited interview(s) as well as online links to send to those who would like to watch or download it.

## Inexpensive.

Our goal is to make this as inexpensive as possible - so everyone can afford it.

And it increases in value over time.

## We Archive for the Future.

We have done hundreds of these in the last 10 years and **all** are still available to watch and download.

Not only do we record your story, but we do all we can to see it survives for the future.

We archive every visualegacy in multiple formats and store them in multiple locations - so even if you lose your copies, we plan on having copies as long as humanly possible.

## We also do...

### Engaged Couples

Imagine having a record of those tender thoughts and feelings to remind us over the course of our marriage.

### Missionary Interviews

We do short interviews before and/or after missionaries serve a mission. It's a Utah thing.

### Parenthood Interviews

We interview mothers in their third trimester about thoughts and feelings about becoming a parent - fathers too.
